TO: Caribbean Heavy Lift & Transport and Barnhart Crane & Rigging:

Re: *Letter of Achievement*

Mr. van Daal & Mr. Yates,

You've recently removed and erected over 570 tons of Steel & Mortar in two motions at the VALERO Aruba Refinery through a contracting agreement with **STARCON** Aruba, Inc. Your transparent 3-D feasibility analysis's, lift plans and performances are to be commended along with the sound and proven capabilities of the MLT Crane by Barnhart. You have greatly assisted in an effective and successful outcome at our July 2006 Convection Replacement Turn Around at the C6AR Unit, and more importantly, in a Safe manner with "0" injuries. Let me convey many thanks to both you and your support teams for your valiant efforts. Working together successfully on endeavors such as this solidifies the meaning of partners.

Sincerely,

Jerry L Shedd
